

WASTE SOIL CLASSIFICATION

Do you have surplus soil you need to manage?

Eyre Peninsula based EP Analysis and niche environmental consultancy Mud Environmental has joined forces to provide a fixed cost, fast turnaround service to classify surplus soils for re-use and / or disposal on the Eyre Peninsula.

All works are completed in full compliance with SA EPA requirements.

With total confidence in cost and timing, you can manage your waste soils without the stress of cost variations and time delays.

Fixed price per volume

Fast turnaround

Shallow in-situ or stockpiled soils

Accredited and experienced staff

Other environmental services available

		Standard (10 working days**)	Fast (5 working days**)
Waste Soil Classification includes: <ul style="list-style-type: none"> Sample collection* and testing of total and leachable concentrations (if required) Comparison to SA EPA Current Waste criteria Verbal advice upon receipt of results Detailed report including statistical analysis 	Small = <1,250 m ³	\$2,950 ex. GST	\$4,050 ex. GST
	Medium = <2,500 m ³	\$4,050 ex. GST	\$6,050 ex. GST
	Large = <5,000 m ³	\$5,550 ex. GST	\$8,550 ex. GST
	Other = >5,000 m ³	Ask for a quote	

The fine print:

includes travel to sites within a 1.5 hr radius of Cummins. Talk to us about additional mobilisation costs for sites outside of this radius
 * Consistent and homogenous stockpiled or shallow soils no greater than 0.5 m depth able to be sampled using hand equipment
 ** turnaround time from executed contract to provision of verbal advice on classification (assuming no leach testing required)
 Laboratory analysis includes common contaminants associated with waste soils in urban Adelaide, which are heavy metals (8) on all samples, total recoverable hydrocarbons, monocyclic aromatic hydrocarbons, polycyclic aromatic hydrocarbons and organochlorine pesticides (1 in 3 samples) and SA Waste screen (1 sample per batch)
